PRODUCT DATA SHEET

Work Line by GT Tool Pocket Top Electra R

EAN 8024482188799

Everything within easy reach

Top Electra R is a belt tool pouch designed to ensure speed, lightness, and organization during field operations. Intended for electricians, maintenance workers, and mobile technicians, it features a wide loop for threading the belt, allowing immediate access to essential tools.

Features

1. Compact and lightweight tool pouch.
Weighing just 0.25 kg and measuring 280 x 70 x 300 mm, it offers a practical and handy solution for carrying your most-used tools.
2. Compatibile con Top Belt R
The rear loop allows secure attachment to the tool belt, turning it into a true wearable tool bag..
The pocket is designed for quick access, ideal for reducing intervention time and working more efficiently.
4. Perfect for dynamic operational environments.
Designed for working at heights, in motion, or on systems, it keeps essentials on hand without overloading your setup.
5. Compatible design with GT Line modular systems.
Can be used with tool cases, professional backpacks, work tool bags, and tool boxes, helping to create a tailored kit for any job.
6. Essential solution for fast and precise tasks.

Ideal as a technical accessory for electrical, electronic, wiring, or maintenance work.
