

## PRODUCT DATA SHEET

### GT Line Tool Trolley AI1.KT02

EAN 8024482178936

#### Maximum Organization and Protection for Tools and Small Parts

The AI1.KT02 trolley by GT Line is a professional tool case **designed for technicians and maintenance workers** seeking durability, organization, and portability.

Made of shockproof high-strength polypropylene, it's perfect for demanding environments and extreme work conditions. **Equipped with modular drawers, removable lids, and an intelligent locking system**, this professional container securely stores hand tools, components, power tools, and small parts. The telescopic handle, self-lubricating wheels, and safety locks ensure smooth and secure transport, even over long distances or during air travel.

Integrated with **INTELLIRESPOND** technology, it allows digital management of contents via a dedicated app - **the ideal work companion for professionals demanding order and reliability.**

#### Features

**1. Heavy-duty construction for extreme work environments**

The AI1.KT02 tool case is made of thick injection-molded polypropylene, ensuring resistance to impacts, dust, water, corrosion, and temperature fluctuations.

**2. Full modularity for custom configurations**

The removable drawers are available in 10 configurations with heights of 30, 60, and 95 mm, empty or equipped with pre-cubed foam or small parts trays, allowing for a fully customizable tool case.

**3. Error-proof locking system**

The "open drawer lock" system prevents accidental drawer removal during use, ensuring safe and orderly organization even during movement.

**4. Quick access and full protection**

The dual removable lid (top and front) with security locks allows full and rapid access to tools while protecting contents from impacts and unwanted openings.

## PRODUCT DATA SHEET

### 5. Smooth handling and easy transport

Equipped with a telescopic handle, two side handles, and four silent self-lubricating wheels, the trolley is designed for frequent and extended transport - even on rough surfaces.

### 6. Advanced protection for tools

The central lock with key and the possibility of using additional padlocks at multiple points offer superior protection against unauthorized access.

### 7. Optimized space and immediate visual organization

Includes a removable top tray, adhesive label for content identification, and name tag holder for quick identification - even when using multiple similar cases.

### 8. Compatible with AI1MOD modular system

The top cover with patented stacking system allows the attachment of AI1MOD modules, making the trolley part of a scalable professional transport system.

### 9. INTELLIRESPOND technology for smart tool management

Integrated INTELLIRESPOND platform with free app for monitoring and digitally cataloging case contents.

### 10. Ideal for air travel

The compact dimensions, low weight (14.17 kg), and robust structure make this professional tool case suitable for traveling technicians and air transport.
