GT Line AI1LID Professional Lid for ALL IN ONE Tool Case

EAN 8024482191515

Update and Transform Your System with Modularity and Innovation

The **AI1LID** cover is the essential accessory for those looking to upgrade previous models of the **ALL IN ONE** system and make them **fully compatible with GT Line's new AI1MOD modular system**. Designed as an integral part of a modular professional container, this cover allows for secure and fast stacking of new modules, **turning a simple tool case into an advanced, expandable, and fully customizable transport system**.

Made from high-strength polypropylene, it is lightweight, compact, and ideal for professionals on the move who need durable, reliable, and modular solutions.

With **AI1LID**, your tool case evolves to meet the demands of the modern professional.

Features

1. Immediate compatibility with existing ALL IN ONE models

The AI1LID lid allows you to quickly upgrade older generation ALL IN ONE trolleys, making them fully compatible with AI1MOD modules and thus expanding their functionality.

2. Patented stacking system for secure connections

Thanks to the integrated patented locking system, the modules can be stacked securely and quickly, creating a solid and professional structure suitable for any work environment.

3. Limitless modular expansion

The lid transforms a simple tool case into a modular professional container, ready to grow with your needs, with the option to stack multiple compatible modules.

4. Lightweight yet ultra-resistant structure

Made of impact-resistant polypropylene using injection molding technology, it offers the right balance between strength and lightness (only 1.50 kg), ensuring high performance even in demanding work environments.
