Work Line by GT Tool Belt Top Tool Belt R

EAN 8024482188782

Freedom of Movement and Immediate Access to Tools

The Top Tool Belt R is designed for professionals who need everything within reach while maintaining agility and comfort during work. Equipped with multiple sewn pockets in various sizes, a hammer or mallet holder, and a tape measure clip, it offers a practical and durable solution for electricians, maintenance technicians, installers, and construction workers. It is the perfect complement to professional backpacks, tool bags, work backpacks, and tool cases, enhancing efficiency and organization in every work environment.

Features

1. Maximum freedom of movement with tools always at hand.

The tool belt is comfortably worn around the waist, allowing you to work with both hands free and reducing movement to retrieve tools.

2. Multiple stitched pockets for smart tool distribution.

The various-sized stitched pockets are designed for durability, ideal for holding pliers, screwdrivers, cutters, and other work tools.

3. Integrated support for hammer or mallet.

The belt includes a dedicated hammer holder to ensure safe and stable transport of heavier and bulkier tools.

4. Quick hook for tape measure or other accessories.

The practical hook keeps the tape measure easily accessible, improving speed and precision during on-site operations.

5. Adjustable for a personalized fit.

Easily adaptable to various body types, ensuring comfort throughout the entire workday, even when moving or in awkward positions.

6. Compact and lightweight structure for dynamic work.

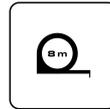

Measuring 500 x 230 mm and weighing only 0.30 kg, it is designed for mobile professionals needing agile, functional support.

7. Compatible with professional tool transport systems.

Perfect to pair with tool cases, trolley backpacks, tool pouches, or professional tool bags for a complete and modular equipment setup.
