PRODUCT DATA SHEET

GT Line Tool Trolley AI1.KT01

EAN 8024482178752

Maximum Versatility and Protection for the Professional on the Move

The AI1.KT01 trolley by GT Line is a professional tool case designed for technicians and maintenance workers seeking durability, organization, and portability.
Made of shockproof high-strength polypropylene, it's perfect for demanding environments and extreme work conditions.
Equipped with modular drawers, removable lids, and an intelligent locking system, this professional container securely stores hand tools, components, power tools, and small parts.
The telescopic handle, self-lubricating wheels, and safety locks ensure smooth and secure transport, even over long distances or during air travel.
Integrated with INTELLIRESPOND technology, it allows digital management of contents via a dedicated app — the ideal work companion for professionals demanding order and reliability.

Features

1. Durable structure for extreme work environments

The AI1.KT02 tool case is made of high-thickness injection-molded polypropylene, ensuring resistance to impacts, dust, water, corrosion, and temperature fluctuations.

2. Complete modularity for custom personalization

The removable drawers are available in 10 configurations with heights of 30, 60, and 95 mm, empty or equipped with precut foam or small parts trays, for a fully customizable tool case.

3. Error-proof locking system

The "open drawer lock" system prevents accidental drawer removal during use, ensuring safe and orderly organization even during transport.

4. Quick access and comprehensive protection

The removable double lid (top and front) with security locks allows full and rapid access to tools while protecting contents from impacts and unwanted openings.

5. Smooth handling and easy transport

Equipped with a telescopic handle, two side handles, and four silent self-lubricating wheels, the trolley is designed for frequent and prolonged transport even on difficult surfaces.

6. Enhanced tool protection

The central key lock and the option to add additional padlocks at multiple points provide superior protection against unauthorized access.

7. Optimized space and immediate visual organization

Includes removable top tray, adhesive label for content identification, and a nameplate for quick identification even among similar cases.

8. Compatible with AI1MOD modular system

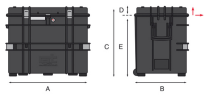

The top lid with patented stacking system allows connection of AI1MOD modules, making the trolley part of a scalable professional transport system.

9. INTELLIRESPOND technology for smart tool management

Integrated with the INTELLIRESPOND platform, with a free app for monitoring and digital cataloging of the case contents.

10. Ideal for air transport

Compact dimensions, lightweight (14.17 kg), and robust structure make this professional tool case suitable for technicians on the move and for air transport.
